# eSafety Label - Action Plan

**Action plan submitted by Sevgi Sağlam for Sabiha Gökçen Meslek Lisesi - 17.12.2020 @ 12:04:03**

**By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.**

# Infrastructure

## Technical security

- You have differentiated levels of filtering in your school which is an excellent policy. A good policy still needs to be regularly updated - is the system being regularly updated? How often are sites requested to be blocked or unblocked? Periodically evaluate whether it is fit for purpose and involve all stakeholders in this process.
  In addition, bear in mind that an educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

- It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.

- It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at www.esafetylabel.eu/group/community/protecting-your-devices-against-malware.

## Pupil and staff access to technology

- All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetylabel.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.

- It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

- Since staff and pupils can use their own equipment on your school network, it is important to make sure that the Acceptable Use Policy is reviewed regularly by all members of the school and adapted as necessary. It must be discussed with pupils at the start of each academic year so that they understand what is in place to protect them and their privacy, and why. Base the policy around behaviour rather than technology. Visitors must also read and

sign the Acceptable Use Policy before they use the school's network.

### Data protection

- You have a good policy of encrypting pupil data and storing it safely. Ensure all new staff made aware of the procedures for encryption and data handling and that there is a named point of contact acting as the data controller for your school. Upload to your school profile some guidelines about protecting sensitive data through an encryption system so that other schools can benefit from your experience.

- It is good that your school records are stored in a safe environment, it is also necessary that they are archived and disposed with in line with the Data Protection Act. Ensure that a good records management system is put in place. Check the according fact sheet for more information.

### Software licensing

- Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.

### IT Management

- There is a mechanism set up in your school that allows any staff member to make a request for new hard/software - a request that leads to an informed decision within a reasonable amount of time. This is great as this way teacher can benefit from new technologies while still staying inline with school policy.

## Policy

### Acceptable Use Policy (AUP)

- It is good practise that whenever changes are put into place in your school, the school policies are revised if needed. Note though, that also changes outside the school can affect policies such as new legislations or changing technologies. Therefore please review your policies at least annually.

- It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.

### Reporting and Incident-Handling

- Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).

- Online issues that take place outside of school will inevitably have an impact inside school. Consider whether the school needs to make a statement about how such issues will be dealt with in the School Policy and the

Acceptable Use Policy. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling), as this enables schools to share and learn from each other's strategies.

- Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the teachtoday.de/en website (tinyurl.com/9j86v84). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form (www.esafetylabel.eu/group/teacher/incident-handling) so that other schools can benefit from your experience.

- It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

### Staff policy Pupil practice/behaviour

- You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your My school area so that other schools can benefit from your experience.

- Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the My school area of the eSafety portal so that other schools can learn from it.

### School presence online

- While your school has an online presence, pupils cannot take part in shaping it. Explore if there could be a way to involve pupils, maybe as part of a digital council. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.

- Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your My school area so that other schools can learn from your good practice.

# Practice

### Management of eSafety eSafety in the curriculum

- It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your My school area.

- eSafety needs to be embedded across the whole curriculum regardless of whether this is a statutory obligation

in your country. There are several very good schemes of work freely available which will support this; for further information see the fact sheet sheet Embedding eSafety in the curriculum at www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum.

- It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.

- It is good practise that in your school Cyberbullying is discussed in the curriculum with pupils from a young age.

- It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the My school area.

## Extra curricular activities

- Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school.

## Sources of support

- It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.

- It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

- It is great that you have a staff member which is knowledgable in eSafety issues who acts as a teacher of confidence to pupils.

- Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at www.esafetylabel.eu/group/community/information-for-parents to find resources that could be circulated to parents and ideas for parent evenings.

## Staff training

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can**

upload evidence of such changes via the **Upload evidence** on the **My school area** section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the **Forum**, and your **reporting of incidents** on the template provided are all also taken into account.
